REFEREES*

PROVIDED ON REQUEST*

CAREER OBJECTIVE

I have attained a tone of skills in both web development and UX/UI design and I believe that under the right guidance and challenge, I will become very valuable and resourceful to any team.

I have proven my ability to collaborate effectively with senior developers while spending extra time being mentored.

I enjoy working closely with team members to ensure workloads are effectively redirected to bottlenecks and personally picking up the slack when necessary.

With a passion for both personal growth and for software development, I completed a 700+ hour coding bootcamp to learn new languages while sharpening existing skills. I am ready to apply my passion for coding to a talented engineering team to develop quality solutions and gain great industry experience.

SKILLS

- » JavaScript
- » React, Wordpress
- » HTML + CSS + SCSS
- » NodeJs
- » Version Control 'git + github'
- » WordPress, Online Orders
- » Adobe Suit
- » Figma + Adobe XD

enJOY

Updating my skills set and knowledge in software through online courses & Youtube to keep up to date with tech trends. I also love hanging with Famil and friends, Music, outdoors and painting
